

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of the claims:

Clams 1-27 (canceled)

27. (New) An adjustable areola and nipple prosthesis comprising:

an areola having an inner concave surface and an outer concave surface, the outer concave surface including a central portion and an exterior portion, said exterior portion containing rounded sebaceous glands and rounded sweat glands of different sizes, the inner concave surface including an adhesive;

at least one circular cut line extending around a circumference of the areola; and

a nipple protruding outwardly from the central portion of the outer concave surface of the areola;

the areola having an adjustable diameter of from about 0.5 to about 3 inches and the nipple having an adjustable height of from about 0.25 to about 1 inch.

28. (New) The adjustable areola and nipple prosthesis of claim 27, wherein the prosthesis is formed of a material selected from the group consisting of petrochemicals, thermoplastics, latex plastics, rubber, foam rubber, silicone, vinyl-PVC, woven material, fabric, textiles, paper goods, natural latex, acrylates copolymer, triethanolamine, propylene, glycol, diazolidnyl urea, methylparaben, propylparaben, polyesters, cellulosics, fluorinated polymers, epoxies, phenolics, collagen, hydrogels, elastic, vulcanized rubber, and combinations thereof.

29. (New) The adjustable areola and nipple prosthesis of claim 27, wherein the adhesive is provided as one or more adhesive circles.

30. (New) The adjustable areola and nipple prothesis of claim 27 further comprising an adhesive on the outer concave surface of the areola.

29. (New) The adjustable areola and nipple prothesis of claim 27, wherein the prosthesis is made of colored materials.

30. (New) The adjustable areola and nipple prothesis of claim 27, wherein the prosthesis is made of flavored materials.

31. (New) The adjustable areola and nipple prothesis of claim 27, wherein the nipple is square in shape.

32. (New) The adjustable areola and nipple prothesis of claim 27, wherein the nipple is rounded in shape.

33. (New) The adjustable areola and nipple prothesis of claim 27, wherein the nipple is pointed.

34. (New) The adjustable areola and nipple prothesis of claim 27, wherein the nipple is flat.

35. (New) An adjustable areola prosthesis comprising:
an areola having an thin and flexible inner surface and an outer concave surface, the outer concave surface including a central portion and an exterior portion, said exterior portion containing rounded sebaceous glands and rounded sweat glands of different sizes, the inner concave surface including an adhesive; and

at least one circular cut line extending around a circumference of the areola, the areola having an adjustable diameter of from about 0.5 to about 3 inches.

36. (New) The adjustable areola prothesis of claim 35, wherein the prothesis is formed of a material selected from the group consisting of petrochemicals, thermoplastics, latex

plastics, rubber, foam rubber, silicone, vinyl-PVC, woven material, fabric, textiles, paper goods, natural latex, acrylates copolymer, triethanolamine, propylene, glycol, diazolidnyl urea, methylparaben, propylparaben, polyesters, cellulose, fluorinated polymers, epoxies, phenolics, collagen, hydrogels, elastic, vulcanized rubber, and combinations thereof.

37. (New) The adjustable areola prosthesis of claim 35, wherein the adhesive is provided as one or more adhesive circles.

38. (New) The adjustable areola prosthesis of claim 35 further comprising an adhesive on the outer concave surface of the areola.

39. (New) The adjustable areola prosthesis of claim 35, wherein the prosthesis is made of colored materials.

40. (New) The adjustable areola prosthesis of claim 35, wherein the prosthesis is made of flavored materials.

41. (New) A method of enhancing breast appearance, the method comprising:

forming an adjustable areola and nipple prosthesis to a desired size by cutting along at least one circular cut line extending around a circumference of the areola to provide an areola having a diameter of from about 0.5 to about 3 inches;

attaching the adjustable prosthesis using an adhesive,

wherein the adjustable prosthesis includes an areola having an inner surface and an outer concave surface, the outer concave surface including a central portion and an exterior portion, said exterior portion containing rounded sebaceous glands and rounded sweat glands of different sizes and a nipple protruding outwardly from the central portion of the outer concave surface of the areola.
